ABOUT ME

I'm a B.Tech Cyber Security student at Haridwar University with a strong interest in ethical hacking, password security, web security, and secure system design. I enjoy building practical cybersecurity-based projects and improving my technical skills through hands-on learning. I'm focused on developing strong problem-solving, programming, and security analysis skills to grow as a cybersecurity professional.

EDUCATION

B.TECH (CYBER SECURITY)

Haridwar University (2023 – 2027)

CLASS 12 (STATE BOARD – BSEH)

Government Sr. Sec. School (2023)

SKILL

- Web Security Basics
- Network Security Basics
- Python
- Responsive Web Design
- Password Security
- Communication

WORK EXPERIENCE

Self-Learning & Cyber Security Practice

- Learning cyber security fundamentals, ethical hacking basics, and secure coding concepts
- Practicing Python programming for logic building and security-based projects

PROJECTS

SecurePass AI – Password Strength Checker

2025–2026

A cybersecurity-based tool that analyzes password strength and provides real-time feedback to users. It helps users understand password security, weak patterns, and improvement suggestions.

- Checks password strength in real time
- Detects weak patterns and common password mistakes
- Provides improvement suggestions for stronger passwords

Portfolio Website Design

2024–2025

Created a personal portfolio UI showcasing projects, skills, design work, social links, and professional information with a clean user experience.

- Personal portfolio homepage
- Project showcase section
- Social links and contact section

INTERESTS

- Cyber Security
- Ethical Hacking
- Password Security
